

Item# 300963 Dock Bench Attachment Instructions.

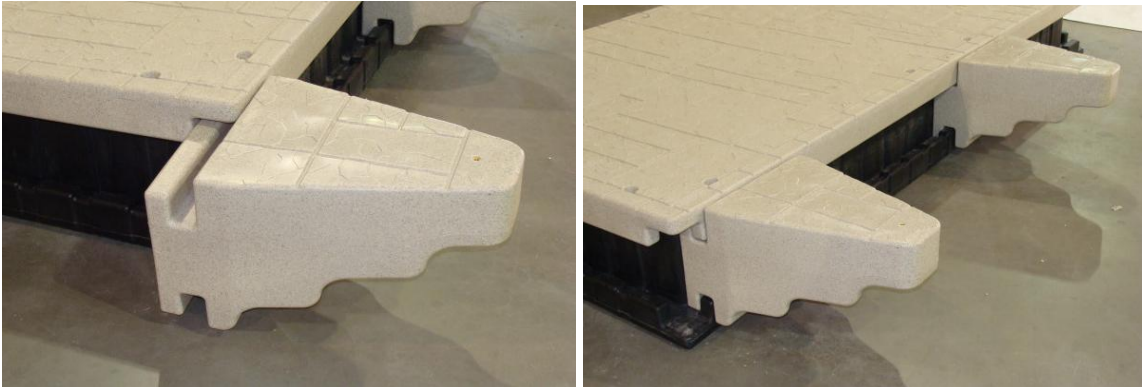

Parts included:

2 - Bench Attachment arms

2 - 3/8 x 1 3/4 bolts

2 - 3/8 washers

1. Insert dock bench attachment arm into the channel on the dock section by sliding it in from the end. Slide the second attachment piece in as well and position them at approximately the correct distance apart for the bench you are using.

2. Position the dock bench on the attachment arms so the bolt hole in the leg lines up with the threaded insert in the attachment. Adjust the bench attachment position as necessary so they align. Secure the back legs of the bench to the attachment arms with the 3/8 x 1 3/4 bolts and washers.
