

NO INVOICE - From Multiple SO's from 2022 and early 2023

As we were moving parts and going through our current inventory we realized that we had some parts with issues from the mild steel inserts rusting. These parts are new and have never left our facility. Please see the list below as discussed with Ben F.

We would like a credit upon these parts and we will transport them and dispose of them. We will offer proof of disposal if required.
